# DS/EN 13126-2:2021

København

DS projekt: M338748

ICS: 91.190

Første del af denne publikations betegnelse er:

DS/EN, hvilket betyder, at det er en europæisk standard, der har status som dansk standard.

Denne publikations overensstemmelse er:

IDT med: EN 13126-2:2021

DS-publikationen er på engelsk.

Denne publikation erstatter: [DS/EN 13126-2:2011](#)

---

## DS-publikationstyper

Dansk Standard udgiver forskellige publikationstyper.

Typen på denne publikation fremgår af forsiden.

Der kan være tale om:

### **Dansk standard**

- standard, der er udarbejdet på nationalt niveau, eller som er baseret på et andet lands nationale standard, eller
- standard, der er udarbejdet på internationalt og/eller europæisk niveau, og som har fået status som dansk standard

### **DS-information**

- publikation, der er udarbejdet på nationalt niveau, og som ikke har opnået status som standard, eller
- publikation, der er udarbejdet på internationalt og/eller europæisk niveau, og som ikke har fået status som standard, fx en teknisk rapport, eller
- europæisk præstandard

### **DS-håndbog**

- samling af standarder, eventuelt suppleret med informativt materiale

### **DS-hæfte**

- publikation med informativt materiale

Til disse publikationstyper kan endvidere udgives

- tillæg og rettelsesblade

## DS-publikationsform

Publikationstyperne udgives i forskellig form som henholdsvis

- fuldtekstpublikation (publikationen er trykt i sin helhed)
- godkendelsesblad (publikationen leveres i kopi med et trykt DS-omslag)
- elektronisk (publikationen leveres på et elektronisk medie)

## DS-betegnelse

Alle DS-publikationers betegnelse begynder med DS efterfulgt af et eller flere præfikser og et nr., fx **DS 383**, **DS/EN 5414** osv. Hvis der efter nr. er angivet et **A** eller **Cor**, betyder det, enten at det er et **tillæg** eller et **rettelsesblad** til hovedstandard, eller at det er indført i hovedstandard.

DS-betegnelse angives på forsiden.

## Overensstemmelse med anden publikation:

Overensstemmelse kan enten være IDT, EQV, NEQ eller MOD

- **IDT:** Når publikationen er identisk med en given publikation.
- **EQV:** Når publikationen teknisk er i overensstemmelse med en given publikation, men præsentationen er ændret.
- **NEQ:** Når publikationen teknisk eller præsentationsmæssigt ikke er i overensstemmelse med en given standard, men udarbejdet på baggrund af denne.
- **MOD:** Når publikationen er modificeret i forhold til en given publikation.

EUROPEAN STANDARD

EN 13126-2

NORME EUROPÉENNE

EUROPÄISCHE NORM

March 2021

ICS 91.190

Supersedes EN 13126-2:2011

English Version

## Building hardware - Hardware for windows and door height windows - Requirements and test methods - Part 2: Window fastener handles

Quincaillerie pour le bâtiment - Ferrures de fenêtres et portes-fenêtres - Exigences et méthodes d'essai - Partie 2 : Poignées à ergot de verrouillage

Baubeschläge - Beschläge für Fenster und Fenstertüren - Anforderungen und Prüfverfahren - Teil 2: Einreiberverschlüsse

This European Standard was approved by CEN on 8 February 2021.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

## European foreword

This document ([EN 13126-2:2021](#)) has been prepared by Technical Committee CEN/TC 33 “Doors, windows, shutters, building hardware and curtain walling”, the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by September 2021, and conflicting national standards shall be withdrawn at the latest by September 2021.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes [EN 13126-2:2011](#).

With regard to [EN 13126-2:2011](#), the following significant changes were made:

- [EN 13126-2](#) now is independent from [EN 13126-1](#); all necessary information are included without the need of any further information from [EN 13126-1](#);
- several editorial changings in the wording for a better understanding;
- terms under [3.4](#) 'locking mechanism', [3.10](#) 'sample', [3.11](#) 'specimen' and [3.12](#) 'test-rig' added; term under [3.6](#) 'key operated locking mechanism' modified for better understanding;
- under [4.1](#) classification system changed completely; former digits 1 (Category of use), 4 (Fire resistance), 5 (Safety in use) and 8 (Application) deleted; former digit 2 changed into box 1 (Durability), former digit 3 changed into box 2 (Mass), former digit 6 changed into box 3 (Corrosion resistance), former digit 9 changed into box 4 (Test sizes); former digit 7 changed into box 5 (Security against burglar attack), new box 6 (Key related security);
- under [4.2](#) new grades for the number of cycles defined; H1 (5 000), H2 (10 000) and H3 (20 000); see also [5.7](#);
- under [4.8](#) new example added for the new classification;
- under [5.7](#) new grades for the number of cycles defined; H1 (5 000), H2 (10 000) and H3 (20 000) in accordance with [4.2](#) established;
- under [5.8.1](#) former [Table 2](#) deleted; all values are listed unchanged in the corresponding clauses and subclauses;
- under [5.8.2](#) the number of cycles adapted to the newly defined grades for the durability;
- under [5.8.4](#) and [5.8.5](#) grade 3 added with 200 Nm;
- under [5.8.6](#) subclause for locking variations regarding key related security added;
- under [5.9](#) subclause for corrosion resistance added;
- under 6 headline modified with “...and preparation for the test”;
- under [7.8](#) subclause for security added with new structure;
- under [Clause 8](#) new clause added regarding marking with information from the current version of [EN 13126-1](#).

This document is one of a series of European standards for building hardware products for windows and door height windows. This document is independent of [EN 13126-1](#).

[EN 13126](#) consists of the following parts:

- [EN 13126-1](#), *Building hardware — Hardware for windows and door height windows — Requirements and test methods — Part 1: Requirements common to all types of hardware*;

- [EN 13126-2](#), *Building hardware — Hardware for windows and door height windows — Requirements and test methods — Part 2: Window fastener handles*;
- [EN 13126-3](#), *Building hardware — Hardware for windows and door-height windows — Requirements and test methods — Part 3: Handles, primarily for Tilt and Turn, Tilt-First and Turn-Only hardware*;
- [EN 13126-4](#), *Building hardware — Requirements and test methods for windows and door height windows — Part 4: Espagnolettes*;
- [EN 13126-5](#), *Building hardware — Hardware for windows and door height windows — Requirements and test methods — Part 5: Devices that restrict the opening of windows and door height windows*;
- [EN 13126-6](#), *Building hardware — Hardware for windows and door height windows — Requirements and test methods — Part 6: Variable geometry stay hinges (with or without a friction stay)*;
- [EN 13126-7](#), *Building hardware — Requirements and test methods for windows and door height windows — Part 7: Finger catches*;
- [EN 13126-8](#), *Building hardware — Hardware for windows and door height windows — Part 8: Requirements and test methods for tilt and turn, Tilt-First and Turn-Only hardware*;
- [EN 13126-9](#), *Building hardware — Requirements and test methods for windows and door height windows — Part 9: Hardware for horizontal and vertical pivot windows*;
- [EN 13126-10](#), *Building hardware — Requirements and test methods for windows and door height windows — Part 10: Arm-balancing systems*;
- [EN 13126-11](#), *Building hardware — Requirements and test methods for windows and door height windows — Part 11: Top hung projecting reversible hardware*;
- [EN 13126-12](#), *Building hardware — Requirements and test methods for windows and door height windows — Part 12: Side hung projecting reversible hardware*;
- [EN 13126-13](#), *Building hardware — Hardware for windows and balcony door — Requirements and test methods — Part 13: Sash balances*;
- [EN 13126-14](#), *Building hardware — Hardware for windows and balcony door — Requirements and test methods — Part 14: Sash fasteners*;
- [EN 13126-15](#), *Building hardware — Hardware for windows and balcony door — Requirements and test methods — Part 15: Rollers for sliding and hardware for sliding folding windows*;
- [EN 13126-16](#), *Building hardware — Hardware for windows and balcony door — Requirements and test methods — Part 16: Hardware for Lift and Slide windows*;
- [EN 13126-17](#), *Building hardware — Hardware for windows and balcony door — Requirements and test methods — Part 17: Hardware for Tilt and Slide windows*;
- [EN 13126-19](#), *Building hardware — Requirements and test methods for windows and door height windows — Part 19: Sliding Closing Devices*

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

# Building hardware – Hardware for windows and door height windows – Requirements and test methods –

## Part 2: Window fastener handles

### 1 Scope

This document specifies requirements and test methods for durability, strength, security and functionality of window fastener handles.

This document does not apply to the following hardware:

- a) handles - primarily for Tilt and Turn, Tilt-First and Turn-Only hardware, refer to [EN 13126-3](#);
- b) sash fasteners, refer to [EN 13126-14](#);
- c) sliding closing devices, refer to [EN 13126-19](#).

NOTE — The handles covered by this document do not have a spindle and the spur is primarily used to achieve the locked closed position.

### 2 Normative references

The following documents are referred to in the text in such a way that some of all of their contents constitute requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
